- Business Management
- Project Management

Soft Skills

- Teamwork
- Problem solving
- Communication
- Adaptability
- Critical thinking
- Time management
- Interpersonal
- Leadership
- Quality driven
- SMART worker

About Me

Hello, I am Marcus. The simplest way to describe me is as a dedicated and detail-oriented aspiring Software Engineer with 2 years experience through personal and freelance projects. I have always been interested in technology, I could never fathom the idea that a Software Developer can turn any idea into something un-imaginable through programming and various forms of AI & Machine Learning. I have a special interest in achieving the utmost quality in everything I do and innovating because Africa is a great playground for young tech enthusiasts with great ideas because there are a plethora of problems we can solve through technology.

I am a very competitive person and always strive to be the best in whatever I do. But I am also mature enough to accept when others are better than me which inspires me to learn from them and keep growing. I am a very big team player because I believe the Divide and conquer problem solving technique is the most efficient problem solving method.

Personal Details

Surname:	Mahlatjie
